- Design and implement Python code using the Django framework
- Design and implement functional requirements
- Build efficient back-end features in Django/Python
- Help integrating front-end components into applications
- Manage testing and bug fixes
- Manage the security of the platform
- Prepare technical documentation
- Collaborate with UX/UI designers to implement design into the code
- Implement software enhancements and suggest improvements

Qualifications

- Solid experience as Django and Python Developer for 3-4 years
- Experience with Django Python frameworks and supporting modules
- Familiarity with social platforms login/interaction integration
- Familiarity with payment gateways integration
- Understanding of databases and SQL
- BSc in Computer Science, Engineering or relevant field
- Knowledge of JavaScript and the AngularJS framework is a plus
- Knowledge of Flutter is a plus
- Attention to detail – Leadership skills
