Flutter Developer

Description

We are looking for an experienced Flutter Developer who will join our team that works on mission-critical applications. Your duties will include managing Flutter (Android, iOS) application development while providing expertise in the full software development lifecycle, from concept and design to testing.

You should have good experience in building high-performing, scalable, enterprise-grade applications and be able to write clean code and ensure your programs run properly. We also expect you to be passionate about building software and perform well working in a team, along with developers, engineers, and web designers.

Responsibilities

- Design and develop high-volume, low-latency applications for mission-critical systems and delivering high-availability and performance
- Create well designed, testable, efficient code
- Participate in all phases of the development life-cycle
- Assist in the preparation and production of releases of software components
- Ensure designs are in compliance with specifications
- Investigate alternatives and technologies and present them for architectural review, in order to support continuous improvement

Qualifications

- Solid experience as Flutter Developer for 3-4 years with at least 2 Apps built in flutter already deployed on both App Store & Google Play
- Have experience with Flutter for both iOS and Android including cameras and sensors operations
- Integration ability with mobile's GPS, contacts, SMS application both iOS and Android
- Knowledge of social platforms integration
- Familiarity with RESTful APIs, GraphQL APIs
- Knowledge of modern authorization mechanisms, such as JSON Web Token
- Familiarity with payment gateways integration
- Understanding of databases and SQL
- BSc in Computer Science, Engineering or relevant field
